Nominee's name: Ida C. Shum

Nominee's laboratory: Lawrence Livermore National Laboratory

Nominee's address: 7000 East Ave., Livermore, CA 94551

shum3@llnl.gov

925-423-9724

Nominee's statement:

I have been fortunate to serve as the FLC Far West Regional Coordinator since October 2008. Should I have the honor of being re-elected, I will continue to work diligently in representing the Far West Region's technology transfer interests within the Federal Laboratory Consortium.

During these tough times, the FLC, federal entities, and laboratories are asked to find positive ways of reacting to changes. It is incumbent upon us to respond in an effective manner that supports our local laboratories and economies. From my vantage point, I am excited to see that the number of collaborative partnerships between government, industry and academia continue to grow as we take on a larger commitment to transfer technologies and maintain economic competitiveness. These partnerships come to fruition through the perseverance, persistence, understanding and willingness to make accommodations within the realm of our resources. In doing so, I hope we can benefit from innovative methods and techniques in order to assist industry, academia, state and local governments to better utilize federal laboratory technologies and assets. In organizing annual meetings, I envision a forum where we can communicate and share resources. I hope that our collective knowledge will enhance and enable the Far West region to strengthen links with other organizations as well as build new opportunities.

I am excited and energized by the prospect of continuing to utilize my experience and work ethic for the benefit of the FLC Far West Region. It would be a privilege to serve you as the FLC Far West Regional Coordinator. Thank you for your consideration.

Nominee's Biography:

Ida C. Shum is a Business Development Executive for Lawrence Livermore National Laboratory. She is responsible for the commercialization of technologies in the areas relating to biotechnology, chemistry and materials. Previously, Ida was at the Idaho National Laboratory commercializing technologies covering national security, industrial processes and materials. She has spent the last five years creating technology partnerships with industrial, private entities, and academic partners.

Ida is currently the Federal Laboratory Consortium (FLC) Far West Region's Regional Coordinator and has been active in the FLC while also service as the Deputy Regional Coordinator from 2005-2007. In 2007, she was recognized as the Far West Region's Outstanding Laboratory Representative. Ida is also an active member in the Licensing Executives Society, where she has spoken on transferring federal technologies to the private sector and been an active participant in the Chemistry, Energy, Environment and Materials sector.

Ida earned her B.S. in Biochemistry from UCLA (1999); her J.D. from the University of Notre Dame (2003). While at Notre Dame Law School, Ida served as the Editor-in-Chief of the Journal of Legislation. She is admitted to practice before the California State Bar and the United States Patent and Trademark Office.
